

Calculation of Total Score

The following is a more detailed description of how to calculate your total course score than the one given in the syllabus.

Quizzes	best 3 of 4	@ 50 points each	=	150 points
Exams	best 2.5 of 3	@ 150 points each	=	375 points
Final		@ 200 points	=	200 points
				<hr/>
		Total		725 points

So, take your best 3 Quiz scores, add your two best Exam scores, add half your worst exam score, and add your Final score, and this total will be your total score for the course. The maximum possible score is 725.

Example: Consider the following scores during the semester:

Quiz scores (out of 50): 41, 36, 44, 48
Exam scores (out of 150): 144, 122, 136
Final score (out of 200): 162

The course total is:

best three quizzes:	41 + 44 + 48	= 133
best two exams:	136 + 144	= 280
half worst exam:	61	= 61
Final	162	= 162

TOTAL = 636 (out of 725) = 87.7 %
