For those giving talks, please plan to use a Power Point presentation on a PC that is already present in the room--bring the presentation on a flash drive or CD. Please be present before the beginning of the session in which you are speaking to put your talk on the room's PC. We will NOT have support for using your own laptop or time to put the talk on the computer at any time other than during coffee breaks.

Please provide the title of your talk when you register, even if it is tentative, you will have an opportunity to change it before September 15.

For those giving poster, please try to use a vertical format, or else keep the maximum width under 48 inches.
