

Format of the Abstract (one-page maximum): Use A4 Paper Size with 2.5 cm (1 inch) Margins, Arial Font, and 1.15 Spacing

A. Author,* B. Author, C. Author (if more than one, presenting author first with *)

*Address or Addresses, with Countries
Email: presentingauthor@address*

The 2026 meeting of the above conference (now with a shortened name) will be held on May 11–15, 2026 (welcoming reception on Sunday, May 10) on the island of Kefalonia, Greece. This is one of the Ionian Islands off the west coast of Greece. The meeting will follow the usual format of the NAGC conference series, namely, a broad program spanning many different areas and applications. The general aim of this conference series has always been to bring together a range of researchers working in diverse fields and applications who might not normally attend the same meeting so we can all learn new things. On behalf of the organizing committee, **it gives me great pleasure to invite you to be a speaker** at this meeting.

The program will again span various areas of chemistry, plus some physics and other disciplines - experimentalists and theorists, makers and measurers, junior and senior. It used to encompass any study on any kind of system involving paramagnetic metal ions, but **the conference is now broader** and we will accept talks that involve any systems that are molecular or non-molecular, and organic, inorganic, or biochemical, including magnetic molecules of any type, MOFs, organic materials/polymers, nanoparticles, machine learning, computational studies, metalloproteins, biomedical studies, and many more.

Figure. One figure, if you wish. Aerial view of Argostoli.

The event will begin with a welcoming reception on the evening of May 10, 2026. The talks will begin on the morning of May 11, and finish in the afternoon of May 15. The talks will be 30 mins (15 mins for students), and there will be no parallel sessions, plenary lectures, or poster sessions.
